Professional Summary

I am a Back-End developer with a post-graduate degree in Systems Development with C# and .NET.

I entered the tech market in 2022 and have since been working on the construction and maintenance of scalable systems, event-driven architectures, databases, and modern monitoring and observability tools.

Proficient in agile methodologies (Scrum and Kanban) that enable me to deliver value through collaborative and well-organized workflows. Advanced English for efficient communication in global teams.

Technical Skills

Programming and Frameworks

- Programming Languages: Proficient in Javascript and C#, with an understanding of object-oriented programming concepts. Framework: Experience in development using the .NET and Node.Js frameworks.
- ASP.NET MVC/Core: Knowledge in web development using ASP.NET MVC or Core.

DataBase
- Familiarity with relational databases, such as SQL Server and MySQL.

Version Control
- Version Control: Experience with version control systems, such as Git.

Testing and Design Patterns
- Unit Testing: Writing and executing unit tests to ensure code quality and integrity.
- Design Patterns: Basic knowledge of common design patterns, such as MVC.

Messaging and Event Management
- RabbitMQ and Kafka: Knowledge in managing and processing distributed events.

Containers and Virtualization
- Docker: Configuration and management of containers for development and production.

Log Management
- Dynatrace and Datadog: Expertise in monitoring and log management for performance analysis.

Monitoring and Automation
- Grafana and Jenkins: Basic knowledge in systems monitoring and CI/CD pipelines.
- Rundeck: Introductory experience in operational task automation.

Professional Experience

Software Engineer - XP Inc.
October/2021 - Present
- Worked on Cashback, Points, VIP Lounge, Marketplace and Shellbox benefits of the Bank Xp credit card:
- Actively participating in the development of robust and scalable back-end systems using C# and .NET Core.
- Implemented integrations with external APIs and event-driven architectures using RabbitMQ and Kafka.
- Collaborated with agile teams in Scrum environments, ensuring deliveries within deadlines and high quality.

Academic Background

Post-Graduation in Systems Development with C# and .NET
Unyleya - [Rio de Janeiro, RJ]

Graduation in Administration
Faculdade Estácio de Sá - [Petrópolis, RJ]

Certifications

- Trybe - Desenvolvimento Web: Front-End, Back-End, Computer Science and Soft Skills. (1.500horas)

Soft Skills

- Assertive Communication: I seek to convey my ideas clearly and objectively, promoting an environment of collaboration and understanding among everyone involved.
- Critical Thinking: I have the ability to analyze problems logically and in detail, evaluating different perspectives to propose the best solutions.
- Collaboration, Organization and Planning: I am organized and always seek to work in a team productively, planning activities to achieve goals efficiently.
- Self-Management: I have proactivity and discipline to manage my tasks independently, maintaining productivity even in dynamic environments.
- Scenario Analysis: I have the ability to evaluate complex scenarios, identify potential risks and develop strategies for more assertive decisions.
- Work under Pressure: I am adaptable and resilient, able to work efficiently even in challenging situations or with tight deadlines.
